

TECO

Our **TecoTray** is designed to be a fully customizable standard case platform available in both aluminum and stainless steel options.

The TecoTray features a low profile design with integrated latches and handles designed to reduce tear points when wrapped. TecoTray is also compatible with closed container systems.

- Customizable brackets, hole pattern, graphics and color(s)
- Cool touch, retractable handles
- Spring-loaded (place and push) latching for positive engagement
- Leading the way in weight reducing design
- Low profile design, wrap friendly
- Compatible with most container systems
- Common components in stock to reduce lead times
